HOT DEGREASING

DEGREASING WITH BASKET MACHINE

LIQUID CLEANER

WATER-BASED MECHANICAL PART DEGREASING

Alkaline liquid product, easy to handle with good degreasing power. Used in spraying or mechanical agitation systems for the degreasing of mechanical parts. Suitable for all metals.

CARBON DEGREASER PI

POWDER DEGREASING

Powder product, with high decarbonising power to clean disassembled cylinder heads. Suitable for all kind of metals. It is used at moderate temperatures reducing energy consumptions. It contains protective agents against oxidation.

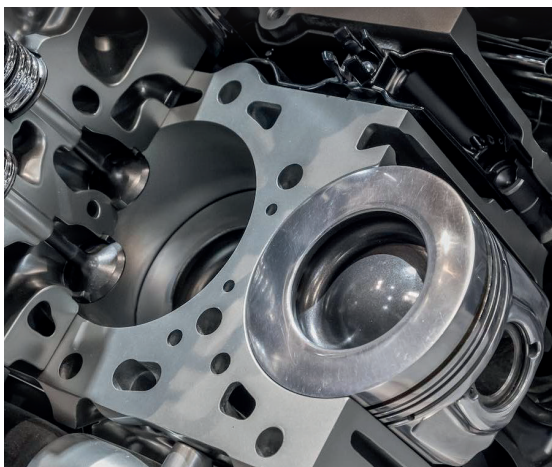

CARBON DEGREASER

POWDER DEGREASER FOR ROTATING BASKET USAGE

Powder decarbonising detergent used with temperatures between 60° and 80°C in spraying, circulating, ultrasonic, and immersion systems. It does not contain silicates. It is used for the removal of carbon residues, oils, greases.

ULTRASONIC DEGREASING

TURBIN DECARB

TURBINE DECARBONISATION

Concentrated alkaline formulation specifically designed for the removal from engine turbines of carbon residues, oils, greases as well as particularly stubborn deposits. Used by ultrasonic immersion. Suitable for ferrous alloys. Not suitable for aluminum.

DENV 11

INJECTOR CLEANING BY ULTRASOUND MACHINES

Emulsifiable solvent-based liquid detergent suitable for cleaning and degreasing mechanical parts and injectors inside tanks equipped with mechanical stirrer or ultrasonic systems.

DECARB 200US

ALKALINE DECARBONIZING DEGREASER FOR ULTRASONIC CLEANING

Alkaline decarbonizer. Used in workshops and maintenance and overhaul companies. To be used in ULTRASONIC TANKS for the removal of light deposits and carbon residues, greases, waxes and oils or other similar substances that are difficult to remove.

COLD DEGREASING

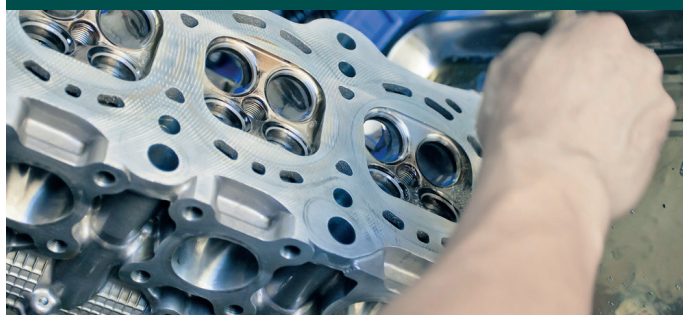

JET 4

MECHANICAL PART CLEANING

Universal degreasing solvent-based product, for cleaning iron, steel and aluminum parts. It can be used cold by brush, spray, and ultra sounds. It is self-cleaning. It does not leave residues and does not attack the caoutchouc or synthetic and insulation materials.

**ANNIHILATE
DIRT!**

MOTORNET

MECHANICAL PART DEGREASER

Solvent-based degreaser manually used at room temperature with regular equipment. It removes grease, oil, tar and asphalt. Safe for degreasing mechanical parts.

BRAVO

READY-TO-USE DETERGENT

Ready to use degreaser, for details in metal, plastic, rubber, and painted parts. removesoil, protectives, grease, light carbon deposits from tools and engine parts, without a ecting surfaces. Also usable on aluminum and light alloys.

**CARB
CLEANER**

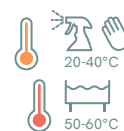

CARBURETOR DECARBONISATION

Carburetor decarbonizer used by cold immersion. It removes carbon deposits, oils and greases, oxide and revives the alloys of the carburetor. It dissolves the old gaskets.

The product has a sealing layer that should be used only when cold and should always be checked.

DEOX 1 AL

EXTERNAL RADIATOR WASH

Acid cleaner for deoxidizing and cleaning alloy components and engine parts made of ferrous alloys. Recommended for external washing of radiators at the end of winter period to remove dirt and scale.

EXTERNAL ENGINE WASHING

LAVMOTOR

ENGINE COMPARTMENT CLEANER

Energetic product, concentrated, water-based, pleasantly scented dedicated to the cleaning of the interior engine compartment. The product does not damage paint, gaskets, plastics.

TODO TOR

LIQUID DETERGENT FOR CLEANING COOLING SYSTEMS THERMAL ENGINES

TODO TOR is a concentrated liquid cleaner with a milky-white appearance, designed for the decontamination of cooling systems, including cases involving lubricant oil leaks or spills inside the cooling circuit itself.

Safe for use on ferrous and light alloys, it does not damage paint, rubber, or plastic components.

ENGINE FAP FILTERS CLEANING

FAP CLEANER

FAP / DPF FILTER CLEANING

Product formulated to solve cleaning problems of fap/dpf filters on diesel engines vehicles.

**MAKE YOUR FILTER
LIKE NEW
WITHOUT REPLACING IT!**

WORKSHOP CLEANING

BRIX AT

INDUSTRIAL LOW FOAM FLOOR DETERGENT

Non-foaming caustic detergent. It doesn't harm material such as stainless steel, enameled iron. Do not use on aluminum surfaces. Exclusively for scrubber dryers.

AIR YELLOW

LIQUID MEDIUM FOAM CONCENTRATED DETERGENT

Super-concentrated alkaline degreaser, manual use even by steam launch. Used for the removal of dirt, dust, oily protective film, grease, light carbon deposits. It can be used on stainless steel and on all metals. At 2.3% it can be used in washer-dryers.

ORDINARY MAINTENANCE

FREN

**BRAKING SYSTEM
MAINTENANCE**

Professional spray for cleaning and maintenance of braking systems.

CLEAR

DETERGENT FOR GLASS

Efficient liquid for windshield washer tanks.

SGRIP

**UNLOCKING (NOT RELEASING)
SEIZING AGENT**

Temporary medium-duration protective dewatering release agent. Designed for industrial use to release mechanisms, nuts, screws and bolts, inhibit rust formation, remove any water residues, prevent the formation of fingerprints, and eliminate existing ones.

MAGIK

**LONG LASTING OILY PROTECTIVE AGENT,
DEWATERING ANTI SEIZE, DEOXIDIZER,
CORROSION PREVENTIVE SPRAY**

Magik is a penetrating, water repellent, protective, lubricating, cleaning, deoxidizing, anti-corrosion spray. It is a calibrated mixture of solvents, protective agents, penetrating, lubricants and corrosion inhibitors, with high water repellent capacity.

ELECTRIC SOLVENT

**CLEANING (NOT DEOXIDIZING)
ELECTRICAL CONTACTS**

Electric solvent is a calibrated mixture of solvents, packaged in an aerosol can, designed for cleaning and degreasing electrical and mechanical parts

RADIATOR 50

ANTIFREEZE & CORROSION INHIBITOR

RADIATOR 50 is an inhibited antifreeze formulation for hydraulic circuits, designed for easy application. It can also be used for topping up sealed systems. This slightly viscous blue liquid allows easy product identification within the circuit and is NON-flammable.

HANDS CLEANING

JOB

HEAVY DUTY LIQUID HANDSOAP

Hand-wash soap formulated with a calibrated mixture of surfactants, with soft agents that condition the skin, which guarantees the cleanness of the hands and their protection.
